

Cardiovascular Information Systems - Reimagined

In a world where medical software is systemically plagued by complexity, Objective Medical Systems is helping cardiologists take back control. Created by cardiologists for cardiologists, our solutions are designed to help you focus on your patients and ease your workflow.

Objective Medical Systems (OMS) was founded on the belief that discrete data and background analysis will revolutionize the practice of medicine, improve patient care, increase physician efficiency, and reduce errors. The OMS software solution was developed and inspired by leading cardiologists in each sub-specialty of cardiology.

OMS C3® Chronic Care Coordinator

A comprehensive solution for remotely managing acute or chronically ill patients. Supports the delivery of Chronic Care Management, Principal Care Management, Remote physiological monitoring, Transition of Care and Intensive Care Rehabilitation services.

1. Cardiovascular Dashboards and Remote patient visit templates specific for Heart Failure, Atrial Fibrillation, Coronary Artery Disease, Peripheral Artery Disease
2. HIPAA compliant video-conferencing to enable seamless patient interaction

OMS Trace Analytics®

Dedicated analytical dashboards for Hypertension, Dyslipidemia, Atrial Fibrillation, Heart Failure, Coronary Artery Disease and Peripheral Artery Disease.

OMS Diagnostics® Reporting

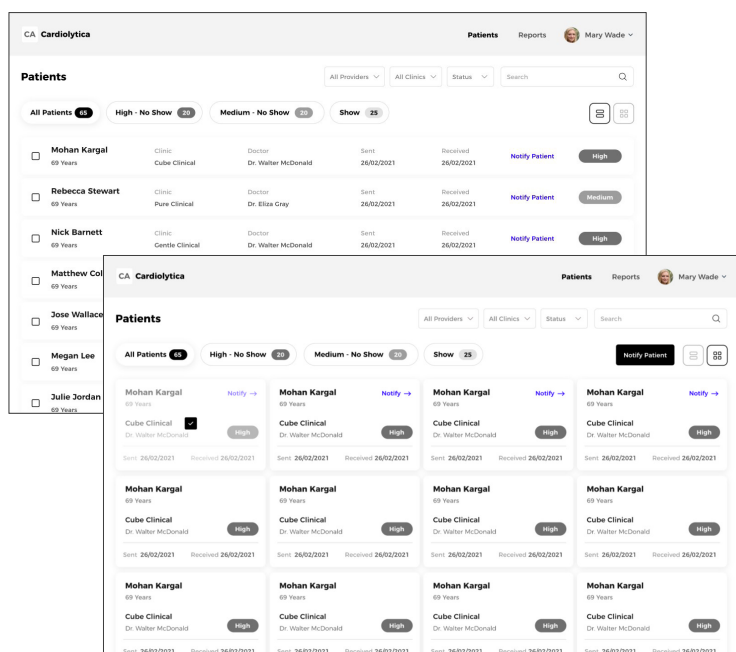

Intuitive structured reporting made easy. DICOM enabled intuitive structured reporting. Create, interpret and report on a wide array of diagnostic modalities like Echocardiogram, Myocardial Perfusion Imaging, PET, Holter, EKG, and Ambulatory Cardiac Telemetry.

OMS Electronic Health Record®

Cardiovascular specific EHR built to optimize cardiology clinic workflow and enhance quality.

- ✓ Integrated with OMS Diagnostics® Reporting
- 📊 Integrated with OMS Trace Analytics®
- 🎤 Speech recognition enabled
- 🕒 Real time Formulary and Benefits
- 🚑 Electronic Prior Authorization

Cardiolytica™

Optimize clinical quality and operational workflows with our plug and play AI platform.

OMS Custom Services

Objective Medical Systems has been developing software products and solutions for hospitals and clinics for more than a decade. With our Custom Services, we can serve as an extended development partner for your software development, testing, training and maintenance needs.

- ✓ EHR Integration
- 📊 Data Quality and Reporting
- 🔬 Clinical Research
- 👤 Patient Portal Development
- 📱 Patient Apps Development
- 🔗 Bluetooth Integration
- 🖼️ DICOM Integration
- 💻 Machine Learning Projects

Objective Medical Systems has emerged as a medical necessity for our practice. It enables our providers to continue to deliver the highest quality of care in this new era of ever-changing requirements.

Dr. Craig Walker

Founder, President and Practicing Cardiologist
Cardiovascular Institute of the South

Objective Medical Systems has allowed me to enhance productivity and quality, which is key when selecting a long-term solution for a busy practice.

Dr. Deepak Thekkoott

Medical Director and Director of Interventional Cardiology
Lane Regional Medical Center

With Objective Medical Systems, our turnaround time for Echo and Stress reporting has definitely improved and we are receiving fewer calls for reports because they are available in the EHR a lot sooner now.

Natalie Shanklin-Steib

Cardiorespiratory Care Diagnostics Coordinator
Terrebonne General Medical Center

Contact us today for a quick, 20-minute tour of our Chronic Care Management Software. The demo will walk you through the various features of the award-winning software including:

- Examples of the individualized patient surveys
- The easy-to-use dashboard that makes remote patient monitoring simple and efficient
- An integrated system that allows you to easily track time and maximize reimbursement
- Insights into new CMS regulations and the numerous CPT billing codes available
